

reservation including a subject and time of an event; and

means for storing said subject of the event of said received calendar reservation at said time of the event in said electronic calendar.

16. A mobile station according to claim 15, and further comprising means for sending said calendar reservation in a user message.

17. A mobile station according to claim 16, wherein said user message is one of a short message, a message according to the standardized SMS message, a message according to the standardized R data field message, a message according to the standardized USSD message, a message according to the standardized SOC message, and a message according to a wireless packet radio service.

18. A mobile station according to claim 16, wherein said user message comprises ASCII characters.

19. A mobile station according to claim 16, wherein said user message includes an identifier identifying said user message as a calendar reservation.--

REMARKS

A favorable consideration that results in the early allowance of all of the foregoing new claims is earnestly solicited, as these claims are deemed to be patentable over the prior art of record.

All of the claims of this continuation patent application are deemed to be in condition for allowance, and this patent application is further believed to be ready to be passed to issue. However, should there be any remaining
